

THE CHALLENGE: GETTING PARENTS IN THE GAME

The key to a child's success is the positive parental involvement in education.

What Works?

In determining what types of parental involvement have the greatest impact on student outcomes, the research identifies one common factor: "Programs and interventions that engage families in supporting their children's learning at home are linked to higher student achievement."

Center for Education Reform, 2013
 Southwest Education
 Development Laboratory, 2013

Decades of research proves that when parents are involved participants in their children's education, students are more successful - not just in school but in life. Parental involvement is essential from preschool all the way through high school. Beyond test scores, the role parents play in school impacts social behavior, attendance, and graduation rates, as well.

There are numerous studies that cite the lack of parental involvement as one of the greatest challenges in the classroom. Both educators and parents agree that the lack of parental involvement is widespread and interferes with student outcomes. One-third of teachers and nearly 50% of parents agree that parents fail to support learning at home. Those statistics increase as students

progress to higher grades with more difficult content that requires more time.

The influence of parental involvement on a student's success cannot be understated. Many educational leaders are looking for ways in which they can enable parents to support learning at home and positively impact student outcomes.

NewPath Learning's Take-Home Modules Are The Parental Involvement Solution!

Providing a Combination of:

- Engaging, Game-Based Learning Resources
- Interactive, Online Lessons
- Professional Development Training & Support

See reverse for complete details!

Teachers' Views

84% of teachers polled indicate that parental involvement and support for learning at home are the most critical factors for student success.

Primary Sources, 2012

Parents' Views

47% of parents admit that they do not spend enough time or take a great enough interest in their children's academic activities.

Metlife Survey of American Teacher, 2012

The Obstacles

**Ability...
Time...
Resources...**

Parents consistently report the lack of ability, resources and time as the two biggest obstacles to be more involved in their children's education

Harvard Family Research Project, 2012

THE SOLUTION: Extend Learning Time & Promote Parental Involvement with NewPath's Take-Home Learning Modules

NewPath's easy-to-use program includes everything needed for engaging, standards-based learning activities at home. Each Take-Home Module includes 25 individually packaged games per subject, leveled by grade and focused on a key Common Core or Next Generation Science Standard concept – A total of 75 games per grade, providing comprehensive coverage of **Math, ELA & Science** – for an entire year!

Send a new game covering a different skill home each week for student review – reinforced through parental involvement!

Each module also includes a one year subscription to NewPath's Online Learning Program which provides students and their parents with interactive, multimedia lessons, activities and games for use at home! Also allows parents a firsthand view of what their children are learning at school. And for teachers, the program provides a means to communicate student progress directly to parents and even develop custom lessons for differentiated instruction for use at home or in class!

FOR PARENTS

- Provides an educational, yet fun way for students and their parents to review key concepts
- Includes a complete set of ready-to-use games with simple instructions that are standard for all 75 games!
- Features illustrated, self-correcting questions so parents can help – even on unfamiliar skills & concepts!
- Requires just a few minutes of fun-filled, home review each evening to reinforce comprehension – perfect for test prep!
- Establishes a routine pattern of nightly study, supported by parental participation
- Fosters positive interaction and communication between students and their parents

Proven Results

"90% of my students realized 1 to 2 grade levels of academic growth in one year!"

"We increased from an overall ELA passing rate of 67.6% to 76.6%! Our overall passing rate in Math increased from 67.5% to 81.5%!"

FOR TEACHERS

- Provides an easy-to-use means of home study, reinforced by parental involvement
- Includes Parent/Teacher Resource Guide to facilitate implementation
- Each game provides materials for up to 4 players: 30 standards-based review questions, game board, game pieces & easy-to-follow parent instructions
- Features laminated game boards and heavy stock review cards – packed in durable, weatherproof pouches for years of use!
- Also perfect for open house or "family fun" nights at school!

Professional Development Support
